PROFESSIONAL SUMMARY

Systems Engineering graduate (Bachelor's Degree) focused on Cybersecurity, seeking an entry-level SOC Analyst (Tier 1) position. Hands-on experience monitoring alerts with Splunk SIEM, detecting intrusions with Suricata and Wireshark, and analyzing vulnerabilities with Nmap and Burp Suite, applying the MITRE ATT&CK framework and backed by the Google Cybersecurity Professional Certificate. Currently preparing for the CompTIA Security+ and AWS Cloud Practitioner certifications. English proficiency: B2 (IELTS).

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Google / Coursera, 2025 (Completed)
- CompTIA Security+ — Exam preparation in progress
- AWS Certified Cloud Practitioner — Exam preparation in progress
- Python for Data Science, AI & Development — IBM, 2024 (Completed)

TECHNICAL SKILLS

SIEM & Monitoring: Splunk, Suricata, Wireshark

Security Frameworks: MITRE ATT&CK, OWASP Top 10, ISO 27001 (fundamentals)

Vulnerability Analysis: Nmap, Burp Suite, Metasploit

Cloud & Containers: AWS (fundamentals), Docker (basic)

Scripting & Automation: Python (Pandas, NumPy), Bash, SQL

Web Development: JavaScript, React, Vite, TailwindCSS, Framer

Incident Management: Jira, Confluence

Data Analysis: Power BI, Advanced Excel

CYBERSECURITY PROJECTS & LABS

Hands-on Projects — Google Cybersecurity Professional Certificate

Apr 2024 – Aug 2024

Evidence repository: github.com/DiegoCh6

- Triaged and prioritized security alerts in Splunk SIEM by severity, mapping attacker tactics and techniques to the MITRE ATT&CK framework to improve detection accuracy.
- Investigated and documented simulated phishing and malware incidents using incident response (IR) methodologies, standardizing the process through investigation playbooks.
- Detected malicious traffic patterns with Suricata and Wireshark, identifying intrusion attempts in simulated lab environments.
- Ran vulnerability scans with Nmap and controlled exploitation tests with Burp Suite and Metasploit, documenting findings against the OWASP Top 10.
- Managed incidents as tickets in Jira and automated analysis and reporting tasks with Python/Bash scripts, streamlining manual security data processing.

WORK EXPERIENCE

HVAC Duct Solutions LLC

Mar 2025 – Jun 2026

Web Developer & Data Analyst — Maryland, USA (Remote)

- Started as a no-code developer in Framer building the corporate website, then in the second year led its full migration to JavaScript, React, Vite, and TailwindCSS, expanding end-to-end development skills.
- Automated operational data processing with Python (Pandas), cutting time spent on manual reporting by roughly 3 hours per week.
- Applied basic web security practices (access control, updates, mitigation of common vulnerabilities), protecting the corporate platform from baseline risks.

Portillo Inmobiliario

Apr 2023 – Dec 2023

Intern — Requirements Analysis & Security (CRM Project) — Arequipa, Peru

- Analyzed requirements and documented the design of a CRM system in Jira, facilitating coordination between the product and development teams.
- Identified vulnerabilities applying the OWASP Top 10 framework prior to deployment, reducing the system's exposure risk in production.
- Supported a simulated ISMS implementation under ISO 27001, documenting business continuity plans and incident recovery procedures.

HACKATHONS & COMPETITIONS

- Innova Sur UNSA – KOICA Hackathon (AWS IoT) — 3rd place, Systems Analyst | August 2023
- Entel Hackathon — 3rd place, Systems Analyst | May 2023

EDUCATION

Universidad Nacional de San Agustín — Arequipa, Peru

2019 – 2023

Bachelor's Degree in Systems Engineering (Top 20% of class)

LANGUAGES

Spanish — Native | English — B2, IELTS Certified
